EXPERIENCE

Ally Financial

Charlotte, NC

Senior Software Engineer, Fraud & AML

June 2026 – Present

- Built a Java Spring Boot Kafka consumer to ingest fraud and AML event streams in real time and route them to downstream systems for analyst review, as part of an initiative to replace a costly legacy fraud platform
- Developed a React/Node.js (Express, TypeScript) fraud investigator portal enabling analysts to review flagged events and enrich them with supplemental transaction and entity data, persisting case data to DynamoDB
- Built a Node.js API layer that enriches flagged fraud events with additional context, applying transformations and querying Snowflake and Oracle to pull entity and transaction details from multiple source systems

Ally Financial

Charlotte, NC

Cloud Engineer, Public Cloud Engineering

May 2025 – June 2026

- Built and maintained a full-stack internal hybrid cloud portal (Vue.js, AWS Lambda, ECS Fargate, DynamoDB) serving all Ally engineering teams, surfacing cloud costs, security vulnerabilities, and resource inventory
- Implemented AWS Trusted Advisor checks to identify underutilized EBS volumes, uncovering 7,414 findings worth \$64K/month in potential savings, with \$30K/month in immediate savings realized through remediation
- Added Dynatrace observability and API error tracking to the portal's major APIs and frontend, enabling faster diagnosis and resolution of user-reported issues
- Migrated backend APIs from DynamoDB to CloudQuery, cutting costs by \$600/month; redesigned the resource catalog UI/UX with lazy loading to support 1M+ cloud resources across 600+ applications
- Architected an event-driven budget alerting system (EventBridge to Lambda to S3) that detects over-budget resources and sends actionable alerts to app managers, replacing manual cost governance reviews
- Built a Claude Code cost dashboard using the AWS Cost Explorer API, surfacing AI spend, cost anomalies, model usage, and projected costs across 7 business units for leadership and FinOps to govern AI adoption
- Extended a patent-pending Terraform starter tool that generates deployable Terraform and CI/CD boilerplate from project configuration, expanding support to on-premises resources and accelerating cloud pattern adoption
- Stabilized and maintained an active-passive failover architecture with a us-east-2 standby region, using Route 53 health checks and DNS failover to ensure portal availability and rapid recovery during regional outages

Ally Financial

Charlotte, NC

Software Engineer, Enterprise DevSecOps

July 2023 – May 2025

- Owned CI/CD pipeline security for all applications in GitLab (600+ applications), enforced scanning such as SAST, DAST, dependency, and container scanning through compliance frameworks enterprise-wide
- Automated the SAST severity override workflow for 960+ rules, allowing cyber analysts to set custom severity thresholds and compare tool-determined severity versus Ally standards to ensure enterprise-wide compliance
- Served on the team on-call rotation, responding to CI/CD pipeline and build incidents impacting developer productivity, and authored post-mortems as primary responder to identify root causes and prevent recurrence
- Engineered Python automation that reviews all projects via the GitLab REST API and GraphQL, dynamically applying CI/CD security policies based on each project's risk rating to meet compliance requirements

Ally Financial

Charlotte, NC

Cloud Engineering Intern, Enterprise DevSecOps

May 2022 – August 2022

- Designed and deployed a production-ready full-stack DevSecOps Portal (Vue.js, REST APIs, AWS Lambda, DynamoDB) surfacing security pipeline status and GitLab project metadata across the engineering workspace

EDUCATION

University of North Carolina at Chapel Hill

Chapel Hill, NC

B.S. Computer Science, Minors in Statistics & Information Systems

May 2023

SKILLS

Programming: Python, JavaScript, TypeScript, Bash/Shell scripting, SQL

Web & Frameworks: Vue, React, FastAPI, Flask, HTML/CSS, Streamlit

Cloud & Infrastructure: AWS (Lambda, S3, DynamoDB, EC2, Athena, IAM, EventBridge, ECS), CloudQuery

DevOps & CI/CD: GitLab CI/CD, GitHub Actions, Terraform, Docker, Claude Code, GitLab Duo

Certifications: AWS Certified Solutions Architect – Associate, GitLab Certified Security Specialist
